Hello,

can I raise Console's buffer under CodeEditor or export it whole(no cut ) to the file?

I would like to log things betwen 'clear up' actions...
(my main point here is to track errors, when 'Rescan Code' is pushed, to find up, what Assist++ don't like in my soo looong code)

thank you

What about to select it (e.g. click, Ctrl+A), copy and paste?
