Hi!

I've just started to discover U++, downloaded upp-mingw from developers' site, installed it and got this problem. After starting TheIDE, when I want either to load or to create new main package, TheIDE crashes with division by zero:

18:10:33 CLOSE struct Splash
18:10:33 OPEN class SelectPackageDlg "Select main package (TheIDE 511 2005-11-14 1:41)"
18:10:33 ACTIVATE class SelectPackageDlg "Select main package (TheIDE 511 2005-11-14 1:41)"
18:10:33 SETFOCUS class ArrayCtrl ("Select main package (TheIDE 511 2005-11-14 1:41)")
18:10:33 SETFOCUS class FileList ("Select main package (TheIDE 511 2005-11-14 1:41)")
18:10:35 LEFTDOWN [36, 7] (LEFT) class Button ("Select main package (TheIDE 511 2005-11-14 1:41)")
18:10:35 LEFTUP [36, 7] ( ) class Button ("Select main package (TheIDE 511 2005-11-14 1:41)")
18:10:35 CLOSE class TopWindow "Select main package (TheIDE 511 2005-11-14 1:41)"
18:10:35 SETFOCUS struct AssistEditor ("AddressBook - GUI - TheIDE - [D:\Work\src\U++\examples\AddressBook\AddressBook.cpp windows-1252] { examples }")
18:10:35 ============ CRASH ==
18:10:35 CRASH: 2005-11-26 18:10:35 code: 0xC0000094 address: 0x4FA98A

My OS: WinXP Pro SP 2.
Please, tell me how to fix this problem. Maybe I've done something wrong?

Forum search and FAQ gave no results.

Thanks.

Obviously not. User can never be blamed for crashing executable

But you are prehaps doing something differently. I will contact you via ICQ ASAP to resolve this....

Ahh, this is long fixed problem.

Actually, problem was with specific theme used on posters machine which forced smaller than usual font and bug with in chameleon style handling - simply for too small font, zero division occured.

Mirek
