Subject: breakpoints ignored, run to cursor: no code at this location

Hello,
I installed 1434 (windows 7 RC 64)
and I also installed mingw (TDM 4.4.0.2)
Only one build method: mingw
built with full debug (output mode: full debug is default)
Seems program runs and won't stop at any BP.
I have sparkled these everywhere.
Also run to cursor always "no code at this location"
Also rebuilt from clean, wiped out dir ...
No changes
Also one more piece of info:
debug external seems to work.
Any idea ?
Thanks.
TN.

Never mind.
Seems things get better if i install
Mingw under C:\ instead of C:\Program Files (x86).
Sorry for useless post.

TN.
