Subject: Incorrect default font settings in Layout Designer

Something wrong with SetFont option in Layout Designer. This bug appeared after 1367 revision. To demonstrate this I created screenshots for 1367 and 1486 revisions with different native dpi font settings (96 and 108 dpi).

OS: Windows XP SP3 (x86).

The bug appeared between 1367 and 1382 revisions when NewDraw was introduced.

Thank you for reporting this.

I hope it should be fixed now. Please check (it is on svn now).

Mirek

Tested with different dpi: SetFont = StdFont().
Now, it's fixed.

Thank you, Mirek.
