Subject: search in "HELP Topic" - Topic itselfs

Hi,

It's nice to search in the Help Topic and get all the pages where the String was found, but it would be nice to search in the topic itselfs to, because the topic for e.g. Ctrl is really long and scrolling through the text is really annoying.

reinhard

Of course, I also lack the search button.

Right button - this button editing. If you click it, the article edit mode is activated and there is a combination of keys Ctrl + F to search.

I get out of the situation in this way, and I hope that there is any solution.

thanks, this tip helps a little bit, but I think this way should not be the "usual" way to work ...
