hello,

I found interesting behavior of PromptOK when the string contains -- or ++.
when -- is in the text then "Error: Not in table:" message appears on the message box.
when ++ is in the text then there is empty editbox on the message box.
Is this "normal"? or bug in the qt below TheIde?
(I have 1252 on win).

gabor

Hi gabor,
It's not a bug, it's a feature PromptOK (and many other controls in U++) allows to use formated text in QTF format. In this format a lot of characters including + and - have some special meaning. If you want to type just ++ or -- you have to escape them by apostrophe:PromptOK("Ultimate'+'+");or escape whole group of characters using byte 1:PromptOK("\1whatever--\1");
For more information about QTF see it's manual.
By the way: There is no qt below theide or u++
