Not sure to what revision you are referring now.

Anyway, in the latest, there are NO LanguageInfoXX classes..

Mirek

ah, i hate it.
when you said LanguageInfo refactored, i downloaded it (windows installer) and Lang.cpp was basically not changed. today it's changed.
but my question is still valid. now in LanguageList (langinfo.cpp), there are three same lines "LNG_('S','E','N','O'),". does this make sense?

It is a quirk. But now it is harmless.
