Hi,

I'd like to have a submenu with images and optional text, with submenus too.

Using default menu structures gives very small images; I need bigger ones, and maybe tailor text placement, or suppress it completely. Is it possible to do it ?

Ciao

Max

Well, I found `MaxIconSize()` that allows to put a bigger image inside a menu item... but the text looks ugly on image right and vertically centered.

Is there a way to fine-tune text placement, maybe superposed to image ?

Ciao

Max

Can you send me a simple testcase?
