Hello,

I still get the occasional bug/crash that only happens with 64 bit exes. When I try to debug I get the message

"Error creating process
D:\MyApps\OCOE\debug\OpenWind.exe
Windows error: The request is not supported."

I just downloaded and validated SDK v7.1 so my question is can anyone else debug 64 bit windows exes and if so what might I be doing wrong please?

Nick

Hi Nick,

I too cannot debug 64 bit binaries from the IDE. So for debugging I use the 32 bit compiler.

Regards, Oliver

This is known limitation and it is even mentioned here:
<http://www.ultimatepp.org/forum/index.php?t=msg&th=6289>

contributions are welcome

I'll check with the budgeting officer.
