Hii Frndz,

Could you kindly let me know how to plot a scatter with XY co-ordinates, where X axis data remains same for series of data in Y axis. [just as vertical XY trend chart in excel, which may be used to compare different parameters on the same plot area]

Hello Shwetha

If you like this yo can try Bazaar/TestScatter2 and use Bazaar/Scatter in your package .

Hii,

I went through the bazar/scatter example, but i din find wat i need.

Find the attachment in my previous conversation which shows different y axis parameters. can u please let me know how can that be coded.

Hello Shwetha

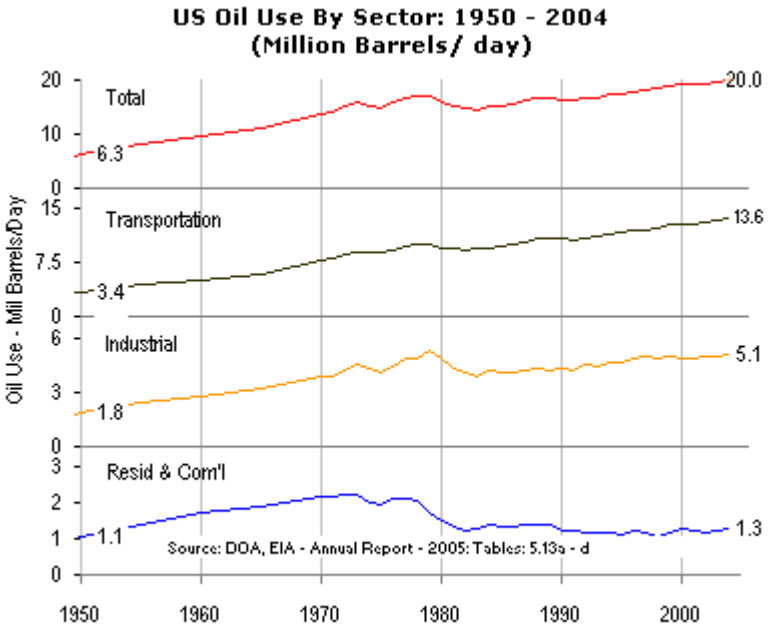

Please check here the "Secondary Y axes" sample. I think it is what you need.

I am not looking for secondary Y axis.

I hope if you check the attachment will be able to get my point wat i am looking for.
I want to plot on single y axis diff parameter one above the other with the same x axis .

Oh sorry. I understand.

No. For now the control cannot do that .
