Subject: Missing dependency for ide/Common

Hi,

I noticed that ide/Common/ComDlg.cpp needs the Draw package, which is not part of ide/Common package. It would be nice to add Draw to the list of packages needed by ide/Common...

Thanks in advance,
Lionel

P.S. I found this by using my upp-waf build system to build the trunk version of theIDE. Its command-line generation system is different from theIDE one, and I was missing paths to freetype headers.

Hello,

Mirek, I suppose you didn't catch this one but it's still a problem for me...

Furthermore, I noticed that ide/Common does not only depend on Draw, but on CtrlLib directly.

Can anyone please add CtrlLib in the list of dependencies for ide/Common ?

Thanks in advance
Lionel
