Hello all

Do you know if it is possible to have e PushButton with text aligned in the bottom?

Hello Koldo.
What's about using Paint method???
In this case, you can place text to any side.

Or, are not clearly formulated question.

AFAIK, there is no PushButton.

We have DataPusher and you can achieve it there using Display.

Hello all

Ups sorry. I meant ButtonOption.

Thank you all. Perhaps the nicer option is to derive something from DataPusher.
