I don't know when it started but it happens over and over again to me from some time. After pressing CTRL-F7 or F7 (compile action) text in current tab gets broken. And it happens in many places in the same time - lines are dividing in two. Take a look at the screenshot. Does anyone experienced this bug?

```
mainShader.SetUniform("viewMatrix", Transpose(scene.cameraMatri
mainShader.SetUniform("projectionMatrix", Transpose(scene.proje
mainShader.SetUniform("modelMatrix", Transpose(modelMatrix).ptr
mainShader.SetUniform("sceneMatrix", Transpose(scene.sceneMatri
//mainShader.SetUniform("sceneMatrix", Identity().ptr, 16, 1);
mainShader.SetUniform("
selectedMode", false);
mainShader.SetUniform("lightsOff", true);

for(float i = step; i <= size; i+= step)
{
    SetVertex(vertices[0].position, -size, 0, i);
    SetColor(vertices[0].color, 0.5f, 0.5f, 0.5f, 1.f);
    SetVertex(vertices[1].position, size, 0, i);
```

On Ubuntu 12.04/14.04 I saw the same effect, but with F5 rather than F7. I thought to have

pressed an unknown key combination since there are many not listed in the help...
Another strange effect I noticed recently is with drop lists of my application. When the dialog comes up, the drop list doesn't drop when clicked. If I move the window or click some input fields before then the drop list behaves as expected.

I have fixed this issue about two weeks ago. The source of problem was optimization of LineEdit::Load (I am frequently loading 200MB of files). Should be fixed now, if any problems are with current sources, please report.
