Subject: Setting the text Color of the Headercontrol

I'd like to make the header controls in my program black with a white text.
I've used the following code for that:

```
HeaderCtrl::Style& hcs = HeaderCtrl::StyleDefault().Write();
hcs.look[0] = Black();
SColorLabel_Write(White());
```

And although this works, I have a problem with the last line, because now also the labels in dialogs are white and I don't wants that.

Solutions?

btw, is it also possible to set the CY value/hight for the headercontrols in ArrayControls?

No need to use chameleon here:

```
ArrayCtrl list;
list.AddColumn("Test").HeaderTab().SetPaper(Black()).SetInk(White()).SetFont(StdFontZ(20));
```
