Subject: ArrayCtrl: Grid

Hi Mirek,

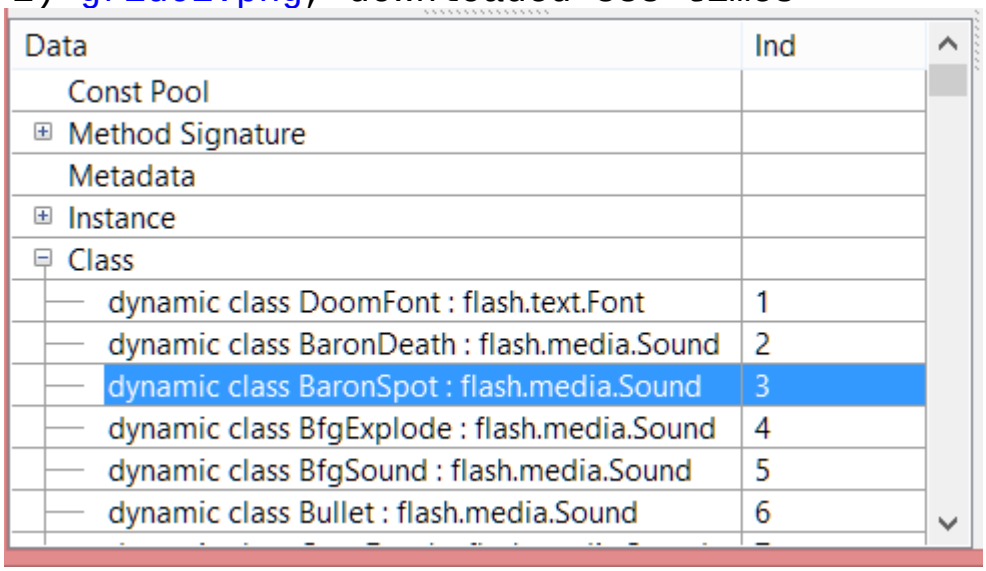

Is it possible to change ArrayCtrl to allow enabling/disabling of horizontal grid on per column base?
This would be useful for columns with custom displays.
Example: a tree-like array control.

Horizontal grid in the first column is not very helpful. Control would look much better without it. Something like WhenHorzGrid and WhenVertGrid callbacks and HorzGrid(int column, bool b = true) would be very helpful.

Thanks.

At the moment, no.

If I was about to achieve this in my code, I would probably disabled grid altogether and altered Display.

Thanks for the hint!
